AV BRIDGES

The AV Bridge family from Vaddio marries professional AV quality with the power of PC applications to create an exceptional audio-visual communication experience.

AV Bridge products make it simple to encode, capture, and stream your AV content from cameras and audio through a variety of PC applications such as Skype for Business, WebEx or Google. Field tested and proven – AV Bridge is the industry standard for converting AV equipment to USB streams.

AV Bridge Solutions

Harness the power of Vaddio's AV Bridge equipment to capture, encode and stream your audio and video sources to PC applications like Skype for Business and WebEx.

Mix, Capture, Control and Stream
IT'S A COMPLETE AV ROOM SOLUTION IN ONE BOX

AV Bridge MATRIX PRO

The technology in AV Bridge MATRIX PRO bridges the gap between PC applications and AV equipment. Now you can connect multiple cameras, microphones, displays and control, mix, switch and capture all from a single device. Users retain all the capabilities of a traditional conference room with the added capability of cloud connection and content distribution.

Why have a full rack of gear when one device can do it all?

• All-in-one AV room solution
• AV Switcher with simultaneous USB and IP streaming
• Four input video switcher
• Three built-in Quick-Connect camera extensions
• 8x4 audio matrix
• Four mic/line inputs with individual echo cancellation channels
• Four EasyMic ports for use with EasyUSB MicPOD devices
• Integrated web server for programming, control and management
